

Korcomptenz

Cybersecurity Advisory and Managed Services

No Risk. All Gain.

Cybersecurity is facing a major challenge

Many organizations today are facing the growing challenge of cyber threats. Despite increasing investments, data breaches still dominate the news daily. We believe the root cause of this issue is that implementing effective security measures is far too complex, and our endeavor is to simplify this process and make security truly effective. We focus on providing solutions that streamline security operations, making them easier to manage and more resilient against evolving threats. Additionally, organizations often struggle with a lack of skilled professionals and the constant need to adapt to rapidly changing attack methods.

| **317.59 million**
ransomware attempts
were detected globally
in 2023.

| **52,000 new**
new IT vulnerabilities
were found by August,
2024.

| **6.06 billion**
malware attacks
happened in 2023, a
10% increase from the
previous year.

| **Over 72%**
of businesses faced
ransomware attacks in
2023, the highest in
five years.

End-to-end Cybersecurity Services to Protect Your Entire Technology Ecosystem from Every Threat.

We cover the entire security lifecycle, from identifying risks to managing them securely. Our services span from roadmaps and architecture to penetration testing, security controls, and managed security services. We offer a comprehensive range of solutions, including Endpoint Protection, Network and Email Protection, Cloud Security Layers, Email Archiving and Backups, Identity and Access Management, Monitoring and Logging, Cybersecurity Testing, and Zero Trust Network Access, ensuring robust protection for your organization across all fronts.

Korcomptenz NOC & SOC Center

Continuous Monitoring

We offer 24/7 monitoring through our NOC and SOC, ensuring proactive detection and response to security threats and operational issues.

Security Event Correlation

We integrate security events from IDS, firewalls, endpoints, and threat intelligence, enabling the detection of complex threats and prioritizing response efforts.

Performance Optimization

Our NOC & SOC teams monitor system performance and availability, proactively identifying bottlenecks, latency issues, and disruptions to optimize performance and ensure uptime.

Advanced Threat Detection

We use advanced threat detection technologies to monitor suspicious traffic, unauthorized access, malware, and other compromise indicators in real-time.

Compliance Monitoring

We ensure compliance with regulatory requirements, industry standards, and internal policies through continuous monitoring and reporting, covering data protection, security best practices, and industry-specific frameworks.

What we Offer

✓ Cyber Advisory Services

- > Evaluate your current security posture and controls to identify gaps and areas for improvement.
- > Develop a robust security plan, outlining the tools, technologies, and processes needed for successful implementation.
- > Strategize and deploy an enhanced security strategy that minimizes disruption to daily operations.
- > Provide expert training to increase security awareness and strengthen your team's capabilities.

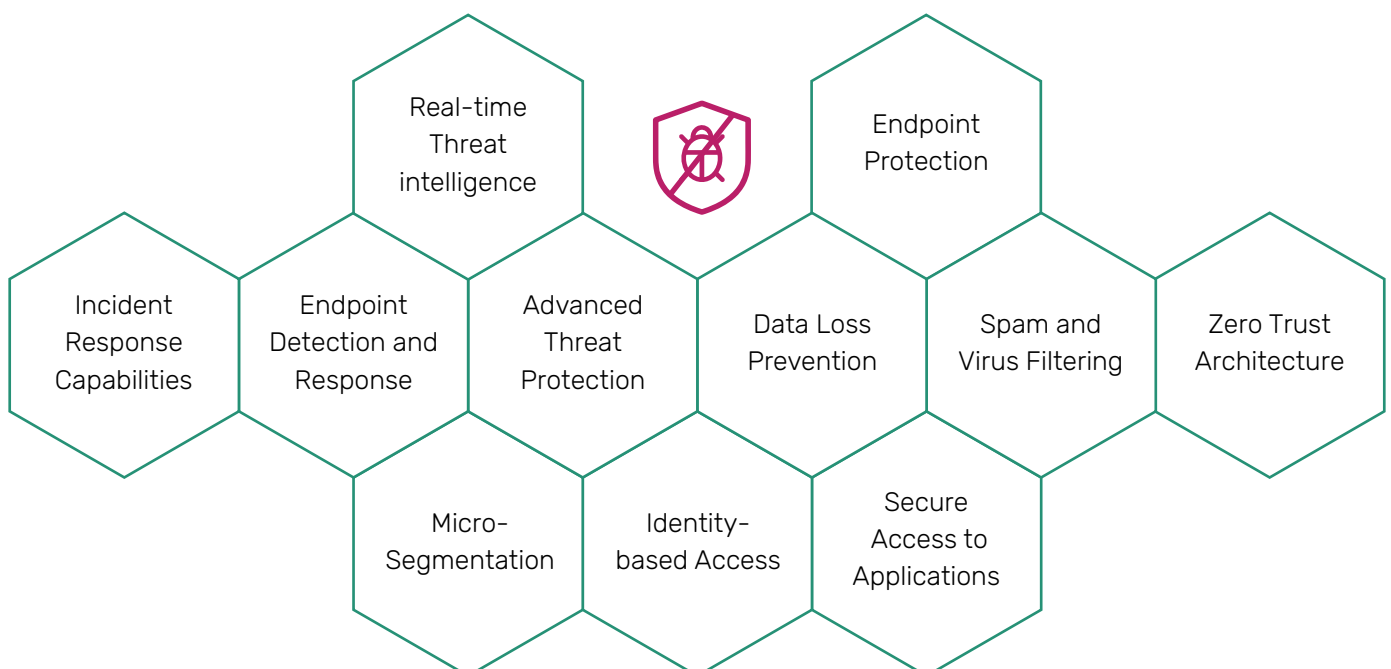

✓ Managed Security Services

- > Provide 24/7 monitoring of your network, cloud environment, and endpoints to detect advanced threats and deliver real-time alerts.
- > Collect data and security event insights from various sources for comprehensive visibility.
- > Quickly identify and respond to security incidents, neutralizing threats through root cause analysis.
- > Investigate and enhance your security posture to prevent future incidents.

✓ Cyber Incident Response

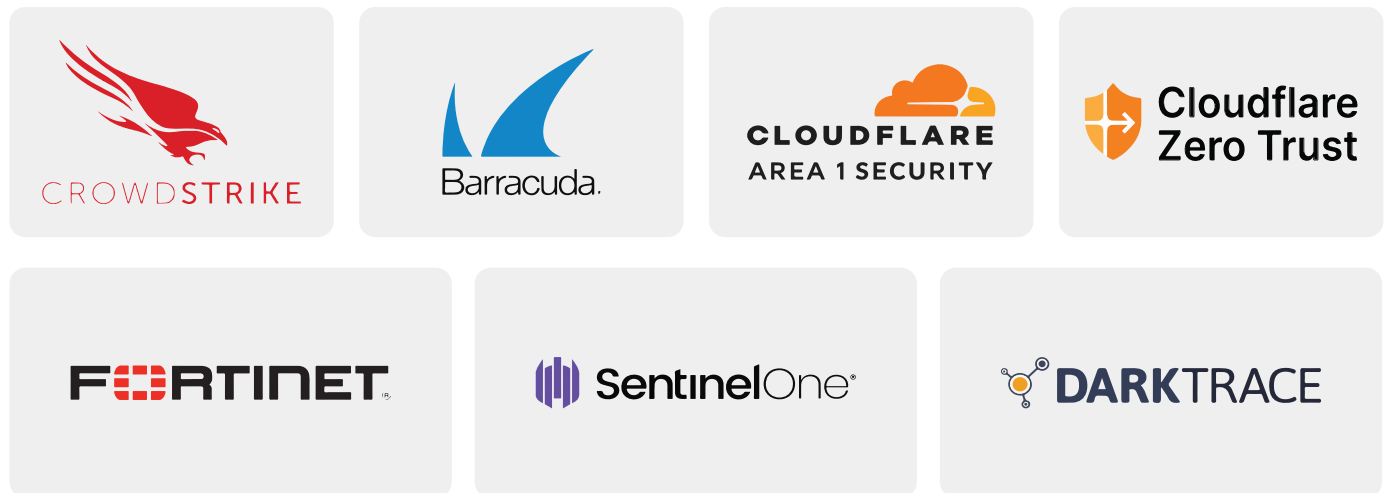

- > Quickly contain the breach and secure your environment to prevent further access by threat actors.
- > Conduct a thorough investigation to identify the root cause and scope of the breach.
- > Implement improvements to strengthen defenses and prevent future attacks.
- > Swiftly restore data and applications to their pre-incident state.

What we Assure

Our Strategic Partnerships

Special Offer: Close Security Gaps with a Security Advisory Assessment

Why It Matters:

As threats evolve and IT landscapes change, traditional networks struggle to protect valuable assets. With increasing demand for mobile access, web applications, and hybrid environments, new security risks emerge constantly. Regular security reviews are key to maintaining strong protection and compliance.

What You Can Expect:

Our Security Advisory Assessment identifies security gaps and provides a strategic roadmap to address them. It ensures compliance, aligns with best practices, and strengthens your security as your business grows. The roadmap helps you plan the budget and resources needed to mitigate risks.

Tailored to Your Needs:

We customize the assessment based on your focus areas and desired level of detail. Whether you need a broad overview or a deep dive, our baseline assessment covers people, processes, and technology. We also offer specialized evaluations for multicloud, OT security, firewalls, and more.

Our Approach:

We evaluate security risks from every angle—starting with vision, risk appetite, policies, assets, and technical controls. Our recommendations are based on standard frameworks like SABSA, ISO 27000, NIST, and CIS.

Through workshops and architecture reviews, we:

- > Identify internal and external security influences
- > Define your current security posture
- > Determine risks and recommend solutions

We then map your current and target maturity levels on our Information Security Dashboard and Security Architecture Reference Model.
