Microsoft
Dynamics[®] NAV

Korcomptenz Business Solutions India Private Limited has extensive experience and knowledge, which help our customers in rapidly implementing real-time IT solutions.

EduUniv – A Campus Vision

- EduUniv is a solution designed on top of Microsoft Dynamics NAV. It provides a complete solution for all types of educational institutions like Schools, Colleges, University and any other authorized centers for education.
- EduUniv is an integrated software, which helps maintain the history of the students and the database is also trustworthy.
- The solution really helps generate different kinds of Analysis and Reports from several modules.
- Integration and consolidated output can be managed as it covers typically all modules from admission to alumni linked with Financial, Sales and Purchase modules.
- The software is very easy to implement. It is understandable, and has user friendly interface. It is not only a cost- saving invention but it is a flexible process to deal with the needs of educational institutions.
- Unique IDs will be generated for all students. All the academical and financial entries will be managed by that ID. Alternatively, we can manage it with other information like name, personal details, etc.
- SMS alert will be sent regarding the Exam schedules, Last date for assignment submission, Non Payees of Fees, Mess bill, etc.
- The time required to add new module or customizing the existing modules can be done with little effort.

Admission

- Application Sales
- Receipt of Application
- Application Details - Prequalification Mark Entry
- Selection Process
- Call letter Generation
- Interview
- Admit
- Fee payment
- Roll Number generation for Student

Academics
