Azure Ecosystem Support

Azure Security	Azure AI and Machine Learning	Azure SQL	Azure Cognitive Service	Azure Databricks	Azure Active Directory
Azure API Management	Azure Arc	Azure Blob Storage	Azure Cosmos DB	Azure Data Factory	Azure Data Lake Analytics
Azure DevOps	Azure IoT Hub	Azure Kubernetes	Azure Machines Learning	Azure Sentinel	Azure Stream Analytics

Our Azure services

1. Readiness Assessment

a. Review of current infrastructure and high level recommendations.

b. Security assessment.

2. Cost Benefit Analysis

a. apex Vs Opex

- Identify and reduce On-Prem Infra cost
- Identify and provision only the needed infra on the cloud

b. Efficient cloud services

- configure and utilize right resources for the application
- reduce overspend on cloud services

3. Cloud Migration

a. Procurement, Configuration, and Installation

b. Setting up server and application infrastructure

c. Data warehousing, Analytics and BI

4. App Modernization

a. Containers

b. Custom App Development

c. Micro services Architecture

5. Cognitive Services

a. Text-to-speech

b. Speech-to-text

6. Cloud Management and Maintenance

a. Managed Services

b. Security Services

7. Cloud Security

a. Ongoing security assessment

b. Security monitoring and management

Korcomptenz

How can we help

Cloud Migration:

A skilled partner like KOR has a vast knowledge of different cloud services and can advise on best migration practices. We will also provide you with consistent migration support, architectural planning and application modernization.

Support services:

We can manage or provide IT services to you remotely, such as Helpdesk, network, application, infrastructure, or security management, by taking full responsibility for those services and proactively reviewing what technologies and services are required to suit your needs.

App Modernization:

Updating legacy systems is a major undertaking, and the transition to the cloud can be difficult. KOR Application Modernization and Migration services will help you reimagine and rearchitect your business and IT processes with a faster and effective approach to modernizing outdated platform-based enterprise applications.

Infrastructure Management Solution:

The highest degree of Managed Services we provide is fully managed IT services. This comprises a 24/7 monitoring system, monthly executive reports, quarterly meetings, and helpdesk support, among other things. The cost of fully managed services is set at a monthly rate.

Azure Integration Services:

There are four main components that go into creating an integration platform. API Management, Azure Service Bus, Azure Logic Apps, and Azure Event Grid are the four components we need to consider. The platform enables you to link internal company systems to boost productivity and reduce time to market.

Advance Data Warehousing:

Azure Synapse Analytics is a limitless analytics service that brings together data integration, enterprise data warehousing, and big data analytics. Korcomptenz can help you implement Azure synapse - a single service for all workloads when processing, managing and serving data for immediate business intelligence and data prediction needs

Interested to know more? Avail our Complimentary Assessment

A detailed plan on 2-Day Assessment:

- We meet with your Executive & Operations team to discuss your organizations technology goals & strategy.
- We understand your current gaps or pain areas & expectations.
- We understand the need of various external integration models with highest level of security.
- We explore the learning path to execute your migration & develop a migration strategy.

In addition to these benefits, Korcomptenz will be able to provide services for backups, user management, on-prem Infrastructure configuration, monitoring & maintenance, as and when needed.

Deliverables:

1. Ensure a 360-degree approach to migration.
2. Integrated first-party migration tools to enable easy lift and shift of applications, data, and virtual machines to Microsoft Azure.
3. High level project plan with estimated costs & timelines.
4. Roadmap for requirement analysis, configuration, development, deployment, and go.
5. Continual monitoring & powerful performance analysis, as well as post-migration optimization for data health & performance.
6. Potential risk & challenges.
7. Internal team skill assessment.

Microsoft Azure | Tour of Service

Korcomptenz

Platform as a Services (PaaS)

Compute/Containers

- Functions
- Kubernetes Services
- Container Instance
- Services Fabric

Web/Mobile

- Web Apps
- Logic Apps
- API Apps
- Mobile Apps
- Notification Hubs
- SignalR Service

DevOps/Developer

- Azure DevOps
- Lab Services
- Application Insights
- SDK

Integration

- API Management
- Logic Apps
- Service Bus
- Event Grid

Media/CDN

- Media Services
- Content Protection
- Video Indexer
- Content Delivery Network

IOT

- IOT Hub
- IOT Central
- Time Series Insights
- Azure Digital Twins
- IoT Edge

AI

- Cognitive Services
- Machine Learning Studio
- Machine Learning Service
- Bot Services
- Azure Search

Analytics

- SQL Data Warehouse
- Azure Data bricks
- Apache Spark
- Stream Analytics
- Data Lake Storage Gen2

Data Services

- SQL Database
- SQL Data Warehouse
- Database for MySQL
- Cosmos DB
- Database for PostgreSQL
- Data Factory
- Database for MariaDB
- Azure Cache for Redis
- Database for Migration Service
- Table Storage

Management

- Azure Monitor
- Log Analytics
- AzurePolicy
- Azure Backup
- Site Recovery
- Azure Blueprints
- Azure Migrate
- Databox Family
- Cost Management

Security

- Security Center
- Azure AD
- Azure AD for Domain Services
- Azure AD B2C
- DOoS Protection
- Key Vault
- Multi-Factor Authentication
- Azure ATP
- Role-based access Control

Infrastructure as a Services (IaaS)

Compute

- Virtual Machine Scale Sets
- Linux Virtual Machine

Storage

- Disk Storage
- Managed Disks

Networking

- Virtual Network
- VPN Gateway
- Express Route
- Load Balancer
- Azure Firewall
- Virtual WAN
- Network Watcher
