We have an extensive experience improving business outcomes for our customers, by leveraging end-to-end solutions involving the ongoing convergence of ERP, CRM, Azure Cloud, Analytics, Artificial Intelligence and IoT.

## PRODUCT CONFIGURATOR

Product Configurator add-on enables the user to configure the finished goods with its properties or specification in order to meet the customer choices or preferences. This add-on can be implemented in Microsoft Dynamics NAV 2016 / 2017 / 2018 and Microsoft Dynamics 365 Business Central and it allows the use to generate sales quote and sales order for their customers as per their specifications on the product they need.

Product Configurator makes the clients sales & production process smooth since their end customer can choose the required variants to specify their final product need.

## HOW PRODUCT CONFIGURATOR HELPS

Create sales order based on the product features selected

Give options on selection of substitute products or parts or materials as per end consumer needs

Create BOM and production order based on the selection and the user can process the orders without any manual interference

Regroup the different variants based on the client needs

## WHO CAN USE IT?

Product Configurator can be used by ecommerce, manufacturing and other product trading companies who are already using Microsoft Dynamics NAV (2016/2017/2018) and Microsoft Dynamics 365 Business Central. This add-on can be implemented to the running system with minimal effort.

This add-on helps you to improve customer experience and reduces the amount of work to generate sales quotes and sales order. It is tightly integrated to Microsoft Dynamics NAV and Microsoft Dynamics 365 Business Central and automatically generate assembly or production BOMs/Routings on sales orders and quotes with being in complete control of the pre-production planning.

Help your end consumers make informed decisions, while adding tremendous value to the sales cycle. As customers pick and choose what they want, they will feel empowered and have a sense of ownership. building upon these.

- Build Sales Quotes and Order easily
- Auto Generate Production BOM & Routings
- Manage additional Charges
