Why KOR?

Our Platform Expertise

Microsoft

Azure Synapse Analytics

Azure Synapse helps you to ingest, explore, prepare, transform, manage, and serve data for BI, and machine learning needs. It gives you the freedom to query data on your terms, using either server less or dedicated options—at scale.

Azure Data Lake

Our certified and experienced consultants let organizations derive cloud scale benefits of this limitless analytics service that brings together data integration, enterprise data warehousing (EDW) and big data analytics.

Azure IoT

Enable highly secure and reliable communication between your Internet of Things (IoT) application and the devices it manages. It provides a cloud-hosted solution back end to connect virtually any device.

Power BI

Our certified and experienced consultants have delivered several Visualization and reporting initiatives for organizations across multiple industries. Power BI lets you connect to and visualize any data using a unified, scalable platform for self-service and enterprise business intelligence (EBI) that is easy to use and helps you gain deeper data insight.

Salesforce

Salesforce Tableau

Connect with customers on a deeper level, by gaining valuable insights as you manage and monitor your business in real time. Tableau enhances Customer 360 with analytics apps, dashboard templates, and seamless product connections.

Salesforce Einstein Al

We can help you to plan your cloud migration, data analytics, AI strategy and analytics insights with Salesforce Einstein that can help accelerate your business. We also help you engage customers and prospects, optimize operations, empower your employees, and increase productivity

Snowflake

We empower organizations by fully leveraging the capabilities of the Snowflake data platform such as data warehousing, data lakes, data engineering, data science, data application development and for securely sharing and consuming data across entity boundaries
